

Instruction Sheet No. 3

Terms and Conditions of Delivery

Packed waste that require crushing

– Drums on pallets –

Additionally: [Appendix to the Delivery Conditions of Instruction Sheets No. 1,2,3 and 5 Materials, which are excluded from Bunker, Shredder or Paste \(Exclusion List\)](#)

In advance of any delivery detailed waste description in English or German language has to be provided (safety data sheet, analysis). Alternatively a sample of the waste may be submitted. Information about modifications of the waste composition must be submitted immediately without request.

Delivery System

- Plastic and metal drums on pallets, up to a volume of 200 l
- Plastic IBC with liquid/pasty material inside (up to a volume of 1,100 l, max 250 kg of solidified materials in the IBC's)
- Big-Bags
- If flammable liquids are delivered, **packaging material** must consist of **electrical conductive material** and permitted according to ATEX
- If drums on pallets are wrapped in, **electrical conductive stretch films** must be used (ESD: Electrostatic Discharge)

Delivery Conditions

- Solid, pasty/sludgy, liquid waste
- Max. weight of each pallet or of a plastic IBC with liquids/paste: 1,000 kg
- Max. height including pallet: 110 cm
- Clearly label the batch according requirements
- Identification of the units and correlation to the paperwork must work
- With liquid waste, leave 10% of the batch volume as room for expansion
- No solid metal parts, sheet metal, iron pipes and rods, gears and castings
- Only metals with a wall thickness of max. 3 mm
- Roller drums and highly elastic and tough materials must be expressly reported before delivery
- **Exclusion List:** Materials which REMONDIS SAVA ist not allowed to accept or which must be excluded from the crusher and the bunker. They are documented in the [Appendix to the Delivery Conditions of the Instruction Sheets 1,2,3 and 5: Materials, which are excluded from Bunker, Shredder or Paste \(Exclusion List\)](#).

Prior agreement must be obtained for deviation from the conditions mentioned above.

Waste declaration

Waste producers have to analyse and declare the following parameters:

- Consistency (solid, liquid, pasty)
- Calorific value
- Ash residue
- Mercury
- Halogenes (single values of fluorine, chlorine, bromine and iodine)
- Total sulphur
- Content of alkali metals (single values of sodium and potassium)
- Content of organic silicon
