

# Instruction Sheet No. 8b

## Terms and Conditions of Delivery

Liquids for special batch tank (Direct Injection)  
(e.g. acids or hot liquids, acrylic and styrene compounds and similar liquids)

In advance of any delivery a detailed waste description in English or German language has to be provided (safety data sheet, analysis). Alternatively a sample of the waste may be submitted. Information about modifications of the waste composition must be submitted immediately without request.

### Delivery System

For the direct injection of liquids at REMONDIS SAVA, the containers have to remain at REMONDIS SAVA

The following containers can be used:

- Tank containers with the following features:
  - a) accumulative ventilation and nitrogen - connection: each 2 inch V flange DN 50 with ball valve
  - b) bottomoutlet 3 inch V flange DN 80 with ball valve

For hot-deliveries in tank-containers, an additional steam connection (dimensioned to 5 bar, 160°C saturated steam) and an condensate-valve (3/4 inch safety-valve VT-3/4 inch IG-SS) is a must

- Plastic IBC's
- 200 l bung-hole drums on pallets
- If flammable liquids are delivered, **packaging material** must consist of **electrical conductive material**, they must be permitted according to ATEX
- If drums on pallets are wrapped in, **electrical conductive stretch films** must be used (ESD: Electrostatic Discharge)

REMONDIS SAVA needs written information in advance about:

- Max. allowed pressure of the tank container
- Prepared pressure of the safety valve
- Position, size and type of the outlet valve
- Position, size and type of the safety valve
- Position, size and type of the nitrogen valve
- Position, size and type of the steam-connection and the condensate-connection at hot-deliveries

### Technical Delivery Conditions

- Waste temperature < flashpoint
- Waste must be pumpable
- Free of sludge, no particles
- No solid agglomerates or foreign bodies such as rags, wood, foil and similar bulk contamination
- Max. viscosity: 190 cps (mPas)
- Essential for "hot-deliveries": solidifying point max. 60° C
- pH 0-14

**Exclusion List**

- Explosives
- Radioactives
- Infectious materials
- Chemical and biological warfare agents
