

# Instruction Sheet No. 5: Terms and Conditions of Delivery of REMONDIS SAVA GmbH

## Pumpable Sludges

**In addition: Appendix to the Instruction Sheets No. 1, 2, 3 and 5: Materials that are not suitable for the bunker, shredder or paste (Exclusion List)**

In advance of each delivery a detailed waste description in English or German language has to be provided (current analysis, safety data sheet). Likewise, a representative sample of the waste may be submitted. **Please contact us in case of deviations from the conditions specified herein!**

**Consistency of the waste: pasty, liquid**

### Possible delivery systems:

- \_ Tanker or vacuum tanker
- \_ ASF-container
- \_ ASP-container
- \_ Plastic IBC (dischargeable; with a maximum of 250 kg of non-dischargeable residue after discharge)
- \_ For the delivery of flammable liquids in **containers** this packaging material must be **electrically conductive** and permitted according to ATEX
- \_ **Electrically conductive stretch films** (ESD: Electrostatic Discharge) are to be used for wrapping in drums on pallets

### Delivery Conditions (please contact us in case of deviations):

- \_ Mercury < 3 ppm (or mg/kg)
- \_ Sulphur < 1.0 %
- \_ Zinc < 1.0 %
- \_ Organically bound silicon < 0.5 %
- \_ Phosphorus < 1.0 %
- \_ Fluorine < 0.1 %
- \_ No finely dispersed elemental metals (Al, Fe, Sn, Ti, Zn) and no elemental magnesium of any kind (e. g. strips, rods)
- \_ pH value > 4
- \_ The waste must not react and not solidify (flocculation, polymerisation, polycondensation) and must remain pumpable if the temperature drops (observe the setting point)
- \_ The waste must be fully pumpable and drain from the container without assistance, sediment content < 30 %
- \_ No foreign materials such as rags, wood, foils or similarly coarse impurities
- \_ In case of liquid waste 10 % of a container's volume have to be left as expansion volume
- \_ Maximum weight of a pallet or an IBC: 1,500 kg
- \_ Labelling of containers according to legal requirements
- \_ The identification of the containers and their assignment to the accompanying documents must be possible

**Excluded from the acceptance in the cassette for pasty sludges** are substances that are not suitable for the bunker due to their risk potential. For this the **Appendix to the Instruction Sheets No. 1, 2, 3 and 5: Materials that are not suitable for the bunker, shredder or paste (Exclusion List)** has to be observed. Those are, for example, dusty, reactive, smelling, toxic substances. These substances – appropriately packed – can be accepted for the drum lift (see Instruction Sheet No. 4).

**Completely excluded from the acceptance and not permitted** are gaseous, explosive and radioactive substances, likewise chemical and biological warfare agents, genetically modified materials, as well as asbestos and carbon fibre reinforced plastics.
