

# Instruction Sheet No. 6

## Terms and Conditions of Delivery

### Liquid waste

Waste for our tank farm. In advance of any delivery a detailed waste description in English or German language has to be provided (safety data sheet, analysis). Alternatively a sample of the waste may be submitted. Information about modifications of the waste composition must be submitted immediately without request.

#### Delivery System:

- Standard or vacuum tankers with equipment for gas displacement procedure

#### Technical Delivery Conditions:

- Waste temperature of the liquid waste < 30 °C
- The waste must be fully pumpable. The waste must not contain solid agglomerates or foreign bodies such as rags, wood, foil, or similar bulk contamination
- Max. viscosity: 190 cps
- Max. sludge content: 2%, max. dissolved solids: 2%, max. suspended solids: 1%
- Max. particle size: 2 mm
- Extremely low boiling liquids and those that have a high dissolved substance content can only be accepted upon prior appointment
- pH > 4 ! If lower pH values are present, please enquire us
- PCB: < 50 ppm (PCB > 50 ppm: Please see Instruction Sheet No. 8a - Special Batch Tank)

### **Surcharges**

Our offers are based on the waste declared by the waste generator regarding the following parameters:

- Total chlorine
- Total sulphur
- Ash residue
- Total fluorine, bromine and iodine
- Total cadmium and thallium
- Total sodium and potassium
- Content of silicon
- Mercury

If the mentioned parameters are exceeded, surcharges are invoiced additionally

### **Excluded from the Tank Farm:**

- All reactive liquid wastes, which may react with themselves or with the existing content of the tank or which are spontaneously decomposing (e.g. peroxides, wastes that may polymerize, oligomerize, or undergo polycondensation, substances that flocculate or tend to become more viscous at falling temperatures, waste that may hydrolyse, dissolved hydrides etc.)

### **Exclusion List:**

- Explosive substances
- Radioactive substances
- Infectious substances
- Chemical weapons
